How to Use Favorites on the Sale Screen of Smartphones

https://help.loyverse.com/help/favorites-on-smartphones · Updated September 1, 2025

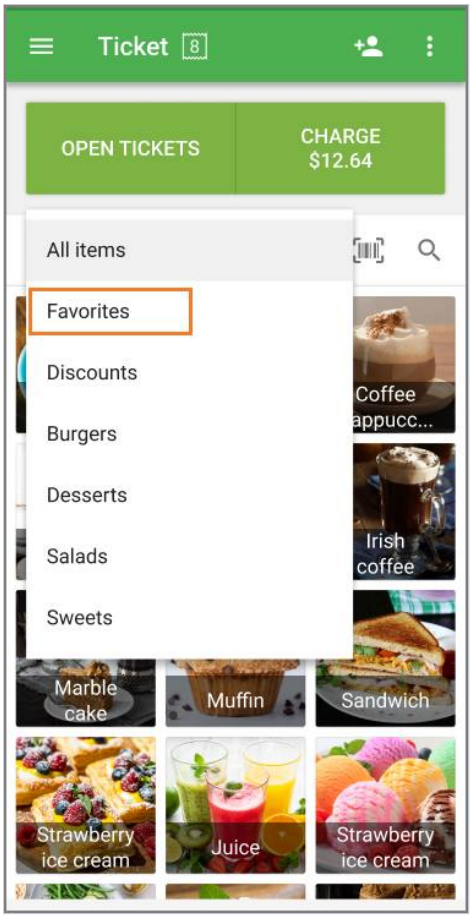

The **Favorites** feature in Loyverse POS on smartphones allows you to create a quick-access list of popular items, making sales faster and more efficient.

Note: This feature is only available in the Loyverse POS app installed on **smartphones**.
On tablets, you can customize the sales screen by creating custom pages and organizing items, categories, and discounts.

Setting Up Favorites

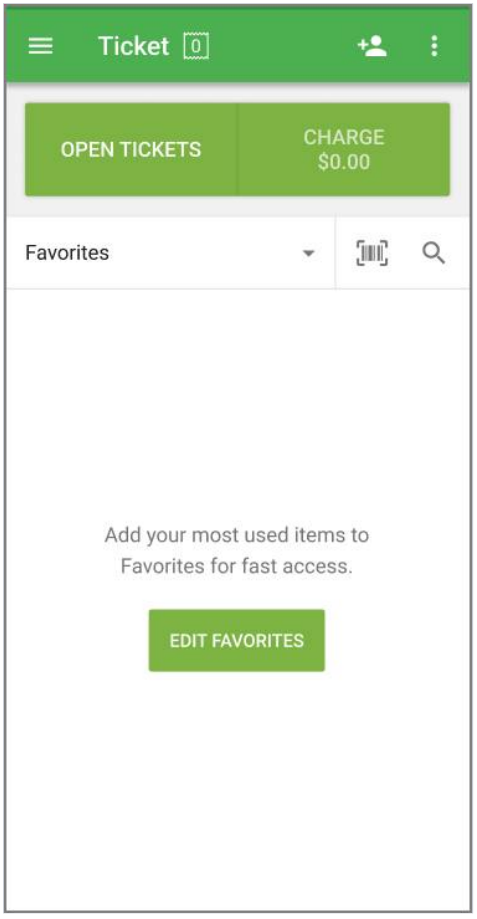

1. **Open the Favorites list**

On the sale screen, tap the '**All items**' drop-down menu and select '**Favorites**'.

2. **Enter edit mode**

Tap the '**Edit favorites**' button.

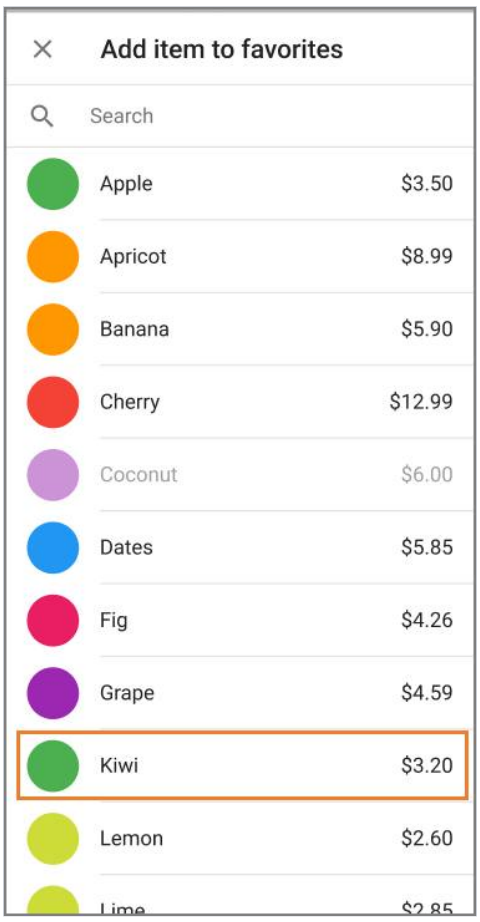

3. **Add items**

Tap the **plus (+)** button to add items to the favorites list.

Select the desired item from the list of all items.

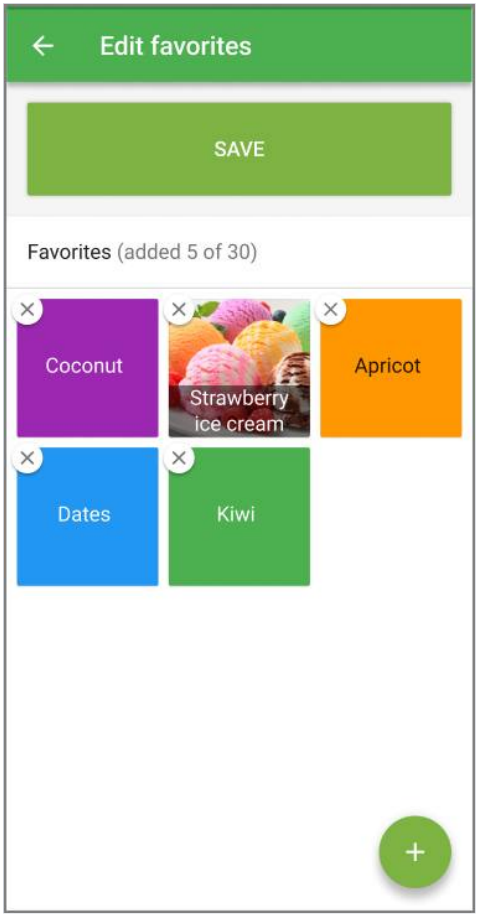

4. **Arrange items**

Drag and drop items to change their order.

Tip: The maximum number of favorite items is **30**.

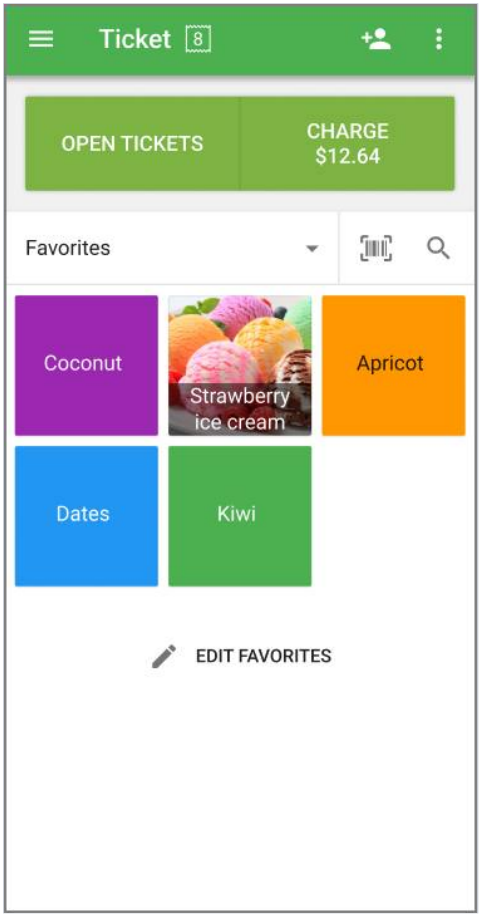

5. **Save changes**

Tap the '**Save**' button to finalize your favorites list.

Using Favorites During Sales

When selling, simply tap an item from the **Favorites** list to add it directly to the ticket—no need to browse through all categories.

Synchronization Across Devices

All favorites are automatically synchronized across all POS smartphones within the same store.
